

# Digital Content Foundation

Digital Content Foundation (DCF) is an international guild of digital content creators and rights organizations who join together with SEN to supervise the fair and equitable distribution of rewards from content consumption on the Internet.

## Goals & Responsibilities of DCF

1. **Create a universal clearinghouse for digital content.** Members of DCF are requested to register their content in the Content SENtry copyright clearinghouse starting in 2019.
2. **Maintain and supervise a micropayment ecosystem.** DCF members discuss and suggest improvements to the system, approve upgrades, and to vote on changes to economic models in the ecosystem.
3. **Promote content creation and fair monetization.** DCF members advocate SEN to their members and customers to build SEN's market share and robustness. A bigger community means more success for everyone involved.
4. **Protect against content piracy.** DCF members resolve disputes with content owners and other parties when there is a question about their content being used without permission.

## Rewards of membership

- Rights to run a paid verification node on the SEN cryptocurrency ledger.
- Voting privileges and a say in the goals of the project.
- Chance to run for DCF appointments.
- Special consideration in SEN rewards.
- Founding members of DCF are allotted a founder's bonus in SEN.

## How to join DCF

Membership in DCF is free. It is by invitation from the founding members or by application and consideration of merit. Candidates are copyright organizations, corporate rights holders, independent or non-profit rights organizations, and prolific individual creators. If you wish to be considered for the DCF, please contact [richard@sen.io](mailto:richard@sen.io) or <https://digitalcontent.foundation>

---

*SEN combines cryptocurrency, micro-payments, and a copyright clearinghouse. SEN is a project of Enfour, Inc. (Tokyo, Japan) and the SEN Foundation (Singapore). Find out more at <https://sen.io>*
